POSEY Pulse Oximetry Sensor Wraps

Posey pulse oximetry sensor wraps replace adhesive tape to secure all models of flexible optical transducers or probe sensors. The wraps hold the sensor firmly to prevent misalignment of optical components, whilst blocking out excessive ambient light. The soft foam tape-less fastener does not stick to the skin, allowing for easy application and removal; this also helps to preserve delicate skin. Model ref. 6554 is a universal design and may be cut to length, model ref. 6554P (premie) has been specifically designed for neonatal applications.

6554 Length: 140mm, Width: 30mm, Thickness: 5mm ♦ **6554P** Length: 100mm, Width: 20mm, Thickness: 5mm
