

Standing at the head of the cot, with the cot lid folded and the hinges towards you, position the cot lid so that the handle is located to the inside edge of the cot.

Slide the lid onto the cot so that the side retaining lips of the lid locate underneath the outer edge of the cot. Slide the lid to the foot end of the cot and the uppermost section of the cot lid can be folded back towards the user and lowered gently into position, centrally on the cot.
