

Dear ,

We would like to introduce our extensive and comprehensive oxygen monitoring catalogue detailing vital equipment and accessories which will assist you for the forthcoming bronchiolitis season.

Detailed within this catalogue are a number of devices used to measure oxygen levels within a number of different situations and applications.

An excellent example of this are the AX300 oxygen analysers and the MX300 oxygen monitors which are used to measure ambient oxygen in ventilator circuits, oxygen hoods/tents, incubators, anaesthesia machines and CPAP circuits along with ability to test medical equipment and gas supply systems to check the correct level of oxygen is being supplied.

Devices such as these are used as vital pieces of equipment for use with oxygen hoods and tents during the bronchiolitis season. They measure the amount of oxygen being supplied to a patient, this is vital as this can effectively determine the patient's recovery process.

I hope you find the enclosed of interest, should you have any further queries please do not hesitate in contacting a member of our team on (01535) 634542.

Yours sincerely

Catrin Hollings
