January 2016

Dear Ms Shasha,

Infant Resuscitation Cabinet

Providing essential equipment for safe and easy infant resuscitation in a compact and discreet cabinet

Many expectant mothers feel the lack of privacy and uncomfortable surroundings of the delivery suite makes giving birth more difficult. Research carried out by the **National Childbirth Trust** found that more than a quarter of women felt it was difficult to cope with labour because of the clinical look of the room and the resuscitation equipment clearly on display.

(Better Birth Environment Survey, National Childbirth Trust, 2005)

Viamed offers an economical and convenient solution to this problem; the ***Infant Resuscitation Cabinet***. As approximately 10% of newborns require resuscitation at birth, the cabinet is unobtrusive when not in use, yet facilitates the essential equipment for safe and easy resuscitation, and is suitable for even the smallest of delivery rooms.

(2010 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care, 2010)

The Infant Resuscitation Cabinet, available in several configurations matched to suit your needs, comprises of:

- **Wall mounted cabinet with antibacterial coating**
- **Wall mounted radiant warmer on articulated arm**
- **Tom Thumb Infant Resuscitation Unit**
- **Low suction controller**
- **Vacsax suction receiving system**, utilising disposable liners
- **Resuscitation platform** manufactured from waterproof construction board
- **Wide bed (35cm)**, to allow easy access to the patient and prevent mattress movement
- **Sealed mattress** manufactured to BS5852 (Crib5) standards
- **Digital Apgar timer**, audible indications at 1, 5 and 10-minutes
- **Storage bins**
- **Air/Oxygen Blender** (optional) to allow delivery of blended gases from 21% to 100% oxygen

Components of the Infant Resuscitation Cabinet can be purchased and used individually.

Please find enclosed our Infant Resuscitation catalogue, detailing the cabinet as well as its components. Should you require further information on any of these items, please do not hesitate to contact a member of our sales team on 01535 634542; between 09:00 and 17:30.

Yours sincerely

Catrin Hollings
