October 2015

Dear «UPOSITION»,

EyeMax₂TM Phototherapy Eye Masks

The soft, safe and secure solution for eye protection during neonatal phototherapy

- Adjustable band for optimum comfort and a secure fit
- Easy to use design
- Ergonomically designed eye protection pads to reduce pressure and increase light protection

The EyeMax₂ has been designed to assure optimum comfort and eye protection for neonates during phototherapy treatment. The single-piece, wrap-around design is secured at two points on either side of the neonate's head and can be independently adjusted to prevent unwanted movement and allows a comfortable and secure fit.

The EyeMax₂ has a unique sunglasses effect sticker on top of the mask, making the mask look less daunting to the neonate's parents. Underneath this, the large eye protection pad has been ergonomically designed to reduce pressure on the neonate's eyes and increase UV light protection.

There are three sizes available as follows:
