### OxyTrue® A evaluation software

The OxyTrue® A PC-Software is used to download measurement data from the OxyTrue® A device onto your computer via USB interface.

The datasets can be viewed and patient data added. Datasets can be printed or exported as CSV file for processing with additional software.

With the OxyTrue® A PC-Software a static summary report can be generated for each dataset.

## Flexible robust and hygienic

**Bluepoint® MEDICAL** provides advanced sensors latest technology which features high quality and comfort.

### SoftCap® SC/SCM/SCP

### SoftWrap® W

Due to its robust design, the SoftCap® and SoftWrap® sensors are well suited for use in the tough environment of rescue services, emergency care and hospital facilities. Reliable elimination of even the most problematic pathogens using highly effective disinfectants.

Bluepoint® Soft Sensors are manufactured from premium materials and their design allows for effective high-level disinfection. This reduces the risk of nosocomial infection associated with surface-borne pathogenic microorganisms.

### Additional sensors

#### SoftFlap® SF

#### Ear Sensor EP

#### Disposables

SoftFlap® sensors are the ideal solution for ambulatory use, or for long-term monitoring. Advanced manufacturing technologies, materials and design elements found their use in these sensors.

High-quality ear sensor with very pleasant wearing comfort and utility. The ear sensor has an additional sensor holder that prevents the ear sensor while wearing/using slip on the ear or is demolished.

Disposable sensors with Plaster Tape – high flexibility and adaptability distinguishes this particularly soft material. By the use of Plaster Tapes the sensors are repeatedly re-applied. Available versions for adults, pediatrics, infants and neonates.
