Dear <<Full Name>>,

Maxtec FLOCAP Flow Indicator & EtCO₂ Detector

Viamed is delighted to introduce the Maxtec FLOCAP into its Capnography range.

The FLOCAP is a single-use EtCO₂ & flow indication device designed for visualisation of a patient's exhaled CO₂ and expiratory flow. The EtCO₂ indication assists the user in verifying proper ET tube placement. The flow indicator helps the caregiver identify end of exhalation which may help prevent breath-stacking or overdistention and its associated health issues during resuscitation.

Please find enclosed the Maxtec FLOCAP leaflet which provides you with further technical specifications.

Should you require any further information please do not hesitate in contacting a member of sales team on (01535) 634542.

Yours sincerely

Catrin Hollings
