Dear <<Full Name>>,

VM-2400 Haemoglobin and Methaemoglobin multi-parameter Monitor

Viamed is excited to announce the launch of the VM-2400 non-invasive Haemoglobin monitor utilising the latest SpO₂ technology platform, innovative signal processing technologies and algorithms which enables the measurement of the following parameters:

- Hb (non-invasive Haemoglobin)
- SpO₂ (functional saturation)
- PR (pulse rate)
- MetHb (Methaemoglobin)
- Hct (Haematocrit)
- PI (perfusion index)

The multi-platform monitor is ideal for use in blood donation centres, relieving the requirement for invasive measurement and laboratory diagnostics. This has the benefits of reducing waiting times for donors, eliminating the risk of cross-contamination and reducing the cost per patient.

Please find enclosed the VM-2400 Haemoglobin Monitor including technical specifications.

Should you require any further information, please do not hesitate to contact a member of our sales team on (01535) 634542.

Yours sincerely

Catrin
