### Why VersaStream<sup>®</sup> CO<sub>2</sub> sampling lines?

- Cost-effective alternative to Nafion<sup>®</sup> tubes
- The gas-selective non-porous material facilitates fast and complete removal of condensation from the sampling line
- The integrated bacterial filter prevents contamination
- Reliable measured gas values, due to negligible dead space volume of the filter - even in cases of high respiration rates
- Integrated bacteria filter and water removal reduces the number of patient circuit parts and speeds up patient monitoring preparation time
