# SMARTsat®

High performance SpO<sub>2</sub> technology

## SMARTsat technology – Now you have a choice!

The SMARTsat technology platform was developed over the last few years, in close cooperation with well-established research institutions and university hospitals.

The very latest and innovative signal processing technologies and algorithms enable precise measurements, even under very difficult physiological conditions. SMARTsat technology has extremely low power consumption requirements, and is a real alternative for OEM customers whom require high-end pulse oximetry solutions for their applications.

In accordance with ISO Standards, the approved pulse oximetry sensors are calibrated and evaluated against dyshemoglobin-free reference measurements, which were determined from CO oximeter data and do not contain saturation components of the hemoglobin fractions SaCO and SaMet.

SMARTsat has been validated within the range of 60 - 100 % SpO<sub>2</sub>.

### SMARTsat A<sub>RMS</sub> in the SaO<sub>2</sub> ranges

	100 - 60%	100 - 90%	90 - 80%	80 - 70%	70 - 60%
Silicone Sensors	1.5	1.3	1.1	1.5	2.4
Finger Clip Sensors	1.2	1.0	1.0	1.2	2.0
Silicone Wrap Sensors	1.5	0.9	0.9	1.7	3.2
Disposable Adult	1.7	1.1	1.5	2.0	2.4
Ear Sensors	1.3	1.3	1.4	1.3	1.7

## Robust, flexible and hygenic

Viamed provides a range of high quality and comfortable sensors that incorporate the very latest technology

### Soft Silicone Sensors

Due to their robust design, the Soft Silicone Sensors are ideal for use in the tough environment of rescue services, emergency services and hospitals.

The Silicone Sensors from the 4000 series are manufactured from premium materials and their design allows for effective high-level disinfection. This reduces the risk of nosocomial infection associated with surface-borne pathogenic microorganisms.

Available in Adult, Small Adult (Medium) and Paediatric sizes.

### Finger Clip Sensor

Finger Clip sensors are the ideal solution for ambulatory use, or for long-term monitoring. Advanced manufacturing technologies, materials and design elements are found in these sensors.

### Silicone Wrap Sensor

Silicone Wrap sensors are for universal applications, for use on infants to adults. Wrap tapes are provided with mounting loops, enabling a simple fixation of the skin friendly wrap sensor.

### Ear Sensor

High-quality ear sensor, which is comfortable and easy to use. The ear sensor has an additional sensor holder that prevents sensor movement and prevents it from being dislodged.

### Disposable Sensors

Disposable sensors with Plaster Tape – the soft material is highly flexible and adaptable. Available in adult, paediatric, infant and neonatal sizes.

## Typical Applications

SMARTsat is designed for integration into:

- High-End SpO<sub>2</sub> monitoring devices
- Patient monitors
- Transport monitors
- Sleep screening devices
- Defibrillators
- Home care monitors
- ... and more
