

breathalyser

Breathalysers from VIAMED

Fast, easy to use, screening and analytical devices to determine the presence of alcohol in the breath

AlcoTrue M is certified to the latest medical standards IEC 60601-1 (3rd edition), IEC 60601-1-2 and is for use in medical environments, such as: Accident & Emergency, Drug & Rehabilitation Clinics and Antenatal Clinics.

Subjects can be screened quickly and easily with maximum hygiene, making it especially well suited for community healthcare centres and rehabilitation programmes.

AlcoTrue P is a professional breathalyser as used by police for law enforcement. The unit is also suitable for use in areas such as: probation services, workplace safety – occupational health & safety compliance programmes, insurance/safety 'drink drive' related initiatives, transport/road safety, education & research and pubs & nightclubs

With both the AlcoTrue M & P, up to five measurement modes can be easily selected: Active (standard), Fast, Passive and if activated Mouth Alcohol mode and Scanning mode (can be used to identify sources of alcohol, i.e. alcoholic drinks).

Results can be easily programmed to display either quantitative or qualitative results of breath alcohol concentrations or derived blood alcohol concentrations. Results are determined by the precise and accurate professional electrochemical sensor and high precision sampling system.

The mouthpieces have an integral water trap & non-return valve; they provide hygienic and accurate measurement.

Up to 35,000 results can be stored on the device and if required results can be transferred to a computer for data management or directly to a dedicated printer.

AlcoTrue C is a professional quality consumer breathalyser designed for use by consumers at an affordable price, but without compromising on accuracy or performance.
