Dear «UPOSITION»,

**Introducing VersaStream CO<sub>2</sub> Sampling Lines** for use with Viamed, Masimo, PhaseIn & Spacelabs

Viamed are excited to introduce VersaStream CO<sub>2</sub> sampling lines as an innovative solution for sidestream CO<sub>2</sub> monitoring, offering a **one-piece sampling solution with increased performance**.

VersaStream CO<sub>2</sub> sampling lines use the latest material technologies to allow the **complete removal of moisture and water** - even in cases of low temperatures and high humidity. They are very flexible and are suitable for both short-term and long-term applications.

#### Why VersaStream CO<sub>2</sub> sampling lines?

- **Cost-effective** alternative to Nafion<sup>®</sup> tubes
- The gas-selective non-porous material facilitates fast and complete removal of condensation from the sampling line
- The integrated bacterial filter **prevents contamination**
- **Reliable measured gas values**, due to negligible dead space volume of the filter - even in cases of high respiration rates
- **Integrated bacteria filter and water removal** reduces the number of patient circuit parts and speeds up patient monitoring preparation time

Available in a number of variants including: single nasal sampling line, nasal cannula, nasal/oral cannula and a one piece airway adapter sampling line.

Please find enclosed a leaflet outlining the range. Should you have any further questions, please do not hesitate in contacting our sales team on 01535 634542.

Yours sincerely

Catrin
