Resuscitaire®

The Resuscitaire is the ideal device to have during labour and delivery procedures. It combines an effective warming therapy platform along with the components you need for clinical emergency and resuscitation.

Babytherm 8004/8010

The latest generation of Babytherm infant warming systems from Dräger sets new standards in open care, not only in providing babies with a unique thermal environment, but also in ensuring you enjoy outstanding ease of access so you can give them the best possible care. Babytherm is an intensive care Infant Warming System intended as a therapeutic device providing warmth for premature and full term neonates.

Birthing Room Warmer

Family-Centered Care is redefining the approach to the care of neonates. Supported by effective clinical therapies, an atmosphere of family warmth and nurturing can reduce the infant's stay, improve outcomes and lead to a quality of life without limits or compromise.

Radiant Warmer With Fixed Cradle

Technology: Micro Processor Based Servo Controlled Electronic Temperature Controller,

Modes: Skin and Manual Controls,

Display: Two Bright Digital Displays with combination of RED and GREEN continues Monitoring of Baby Temp and Set Temp, Set Temp easily switchable to centigrade to fahrenheit,

Safety: Independent Hi Temp sensor for Hi Temp Cut off at 39 degrees,

Alarms: Audio and Visual Indications for Baby Probe Failure, 1degree High, 1degree Low, Hi temp Cut off and power fail,

Examination lamp: latest Power Saving LED Lamp For Procedures,

Heater: German Make Ceramic Heater With parabolic reflector to maintain uniform Temperature Across the mattress,

Baby Trolley : multipurpose Fixed Baby Cradle mounted on Four anti skid Casters with provision for undersurface phototherapy unit,

Baby Tray : MS Powder Coated with four sides Clear Acrylic Panels, Front and Both Sides Collapsible with Tilting Facility, Clear Acrylic Base for under surface phototherapy treatment,

Power: 240V, 50 Hz, 1000W Maximum

Radiant Warmer with Fixed Baby Caradle

Technical Specifications :-

Technology: Micro Processor Based Servo Controlled Electronic Controller,

Mode: Skin / Air and Manual Control,

Display: Two Bright Digital Displays with combination of RED and GREEN continues Monitoring of Baby Temp and Set Temp, Set Temp easily switchable to centigrade to fahrenheit,

Safety: Independent Hi Temp sensor for Hi Temp Cut off at 39 degrees,

Alarms: Audio and Visual Indications for Baby Probe Failure, 1degree High, 1degree Low, Hi temp Cut off and power fail,

Apgar timer Facility,

Examination : latest Power Saving LED Lamp For Procedures,

Heater : German Make Ceramic Heater With parabolic reflector to maintain uniform Temp across the mattress with swiveling source Box easy to take x-ray and Procedures,

General Specifications:-

Baby Tray : MS Powder Coated with four sides Clear Acrylic Panels, Front and Both Sides

Collapsible with Tilting Facility, Clear Acrylic Base for under surface Phototherapy with X –Ray Cassette Compartment,

Monitor Tray : Side Monitor Tray Provision to Keep Monitor or pulse Oximeter,

I V Stand : Side IV pole to Mount Multiple Syringe Or Infusion Pumps with Adjustable Stainless steel IV Inner,

Bottom Tray: To keep Resuscitation items or Under surface Phototherapy,

Base: Mounted on Imported anti-skid Casters with locking Facility

Power 240V, 50Hz, 1000W Maximum

Optional : Storage Box / LCD Screen

Radiant Heat Warmer

Technical Specifications :-

Technology : Micro Processor Based Servo Controlled Electronic Controlle,

Mode :Skin /Air and Manual Control With LCD Screen,

Display:Two Bright Digital Displays combination of Red and Green to continues Monitor of Baby Temp and Set Temp, easily switchable to centigrade to fahrenheit,

LCD Display: Backlight Bright LCD Screen with Full Information along with Alarm Indication massages,

Safety: Independent Hi Temp Cut Off with Hi temp Sensor at 39 degree

Alarms: Audio and Visual Indications for Baby Probe Failure, 1degree High,1degree Low, Hi temp Cut off and power fail,

Apgar timer Facility,

Examination : latest Power Saving LED Lamp For Procedures,

Heater : German Make Ceramic Heater With parabolic reflector to maintain uniform Temp across the mattress

with swiveling source Box easy to take x-ray and Procedures,

General Specifications:-

Baby Tray: SS Powder Coated with four sides Clear Acrylic Panels, Front and Both Sides Collapsible, baby tray with Tilting Facility both head up & down, Clear Acrylic Base for under surface Phototherapy with X –Ray Cassette Compartment,

Monitor Tray: Side Monitor Tray Provision to Keep Monitor or pulse Oximeter,

I V Stand : Side IV pole to Mount Multiple Syringe Or Infusion Pumps with Adjustable Stainless steel IV Inner,

Bottom Tray : To keep Resuscitation items or Under surface Phototherapy,

Base: Mounted on Imported anti-skid Casters with locking Facility,

Optional : Storage Box

Radiant Warmer With LED Phototherapy

Technical Specifications

Technology: Micro Processor Based Servo Controlled Electronic Controller,

Mode: Skin /Air and Manual Control With LCD Screen,

Display: Two Bright Digital Displays combination of RED and GREEN continues Monitoring of Baby Temp and Set Temp, Set temp easily switchable to 0C to 0F

LCD Display

Bright Backlight LCD Screen with Full Information along with Alarm Indication messages

Safety Independent Hi Temp sensor for Hi Temp Cut off at 390C

Alarms

Audio and Visual Indications for Baby Probe Failure, Air Probe Failure, 10C high,

10C low, Hi temp Cut off and Power Fail

Examination latest Power Saving LED Lamp For Procedures

Heater

German Make Ceramic Heater With parabolic reflector to maintain uniform Temp across the mattress with swiveling source Box easy to take x-ray and Procedures Phototherapy

latest high bright Super Flux LED Top Surface Phototherapy with Digital timer for Total lamp usage and patient exposure with programmable auto Switch of

General Specifications

Structure

Made with high quality FRR [Fire Retardant Resin] grade fiber material for extra safety from electric shocks and corrosion. Newly designed oval shape baby tray with four sides collapsible clear acrylic panels. Head up & down tilting facility for baby tray. Clear acrylic base for Phototherapy with X ray cassette compartment

Monitor Tray For keeping patient monitor or pulse oximeter

I V Stand

Side IV Pole to Mount Multiple Syringe or Infusion Pumps with Adjustable Stainless steel IV Inner

Bottom Tray To keep Resuscitation items or Under surface Phototherapy

Base Mounted on Imported anti-skid Casters with locking Facility

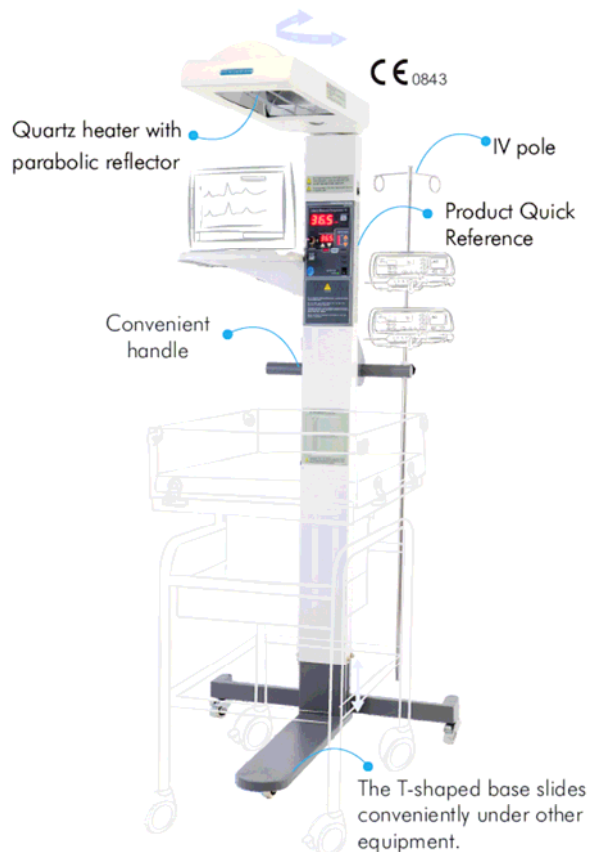

Optional s Storage box / Pulse oximeter

Phoenix Medical Systems.com - NWS 101. Floor standing unit.

Website: <http://www.phoenixmedicalsystems.com>

Emailed 11/07/13

The NWS 101 provides radiant warmth for infants suffering from severe heat loss. It is suitable for all environments from labour rooms to neonatal ICUs.

FEATURES

Infrared (IR) radiation is beamed from a quartz heater by a parabolic reflector. This provides uniform warmth rapidly all over the bed. The heater can be operated in servo and manual modes.

The height of the heater unit may be adjusted (by qualified engineers) for different bed heights.

The heater unit may be swivelled to accommodate X-ray units.

The **NWS 101** is mounted on castor wheels. The low T-shaped base slides under other equipment such as different bassinets and the mother's cot.

All the castors are provided with foot-operated brakes. The **NWS 101** may be shifted easily by just one person using the convenient handles.

The infant temperature is measured quickly using a high-sensitivity thermistor probe and displayed on a large, easy-to-read LED display. The display has a battery back-up and indicates the temperature even during power failures.

The control panel is ergonomically designed with soft-touch keys. This modular panel may be easily removed if servicing is required. An easily accessible quick reference is provided on the side of the **NWS 101**.

The **NWS 101** is equipped with a dazzle-free observation light for examination of the infant.
